La-Z-Boy Recliner

We took a
great idea...

La-Z-Boy® invented the recliner chair in 1928, and they have been perfecting it ever since. But progress in comfort doesn't need to be limited to the indoors and we have now applied our innovation and quality standards in the development of the perfect hot tub.

A La-Z-Boy spa program that provides everything you need to relax, rejuvenate and dream in complete comfort. So let us show you how easy it is to turn your dreams of the ideal backyard sanctuary into reality.

What are you waiting for? **Jump in.**

hot water.

To your good

Hydrotherapy, or warm water therapy, in a La-Z-Boy® Spa consists of three main healing components; heat, buoyancy, and massage. Together, they create an exceptional experience that is both relaxing and incredibly healthy.

Using a La-Z-Boy Spa on a regular basis provides physical health benefits that go much deeper than just relaxation and pleasure. Water is so pure and simple, yet it can do the most amazing things. Whether you are experiencing joint or muscle pain, have trouble sleeping, or are just plain stressed out, spending time in La-Z-Boy Spa can provide therapeutic benefits for just about everyone.

Reduce Stress, Headaches and Improve Sleep

Warm water massage stimulates the body to release endorphins that can significantly reduce stress, La-Z-Boy® Spas hydrotherapy jets also dilate blood vessels to help prevent headaches. In addition, when it comes to falling asleep faster and getting a good night's sleep, the National Sleep Foundation clearly states that *"soaking in a hot tub before retiring to bed can ease the transition into a deeper sleep."*

Relieve Muscle and Joint Pain

In recent years the use of hydrotherapy hot tubs by athletes has skyrocketed and La-Z-Boy® Spas are now set to lead the way in offering these benefits to a broader audience! A popular sports magazine said it best: *"Your skin and muscles loosen and relax from the increased blood circulation"* adding that, if muscles are injured: *"A soak in a hot tub increases blood flow to the injured area, bringing nutrients to help repair the damage."*

health!

Soothe Pain Caused by Arthritis

Warm water hydrotherapy treatment in a well designed hot tub is believed to help those with pain caused by arthritis. It is also thought that hydrotherapy is one method of using water to help treat arthritis with the soothing warmth and buoyancy of the water making it a safe, ideal environment for relieving pain.

Spend More Time with Family and Friends

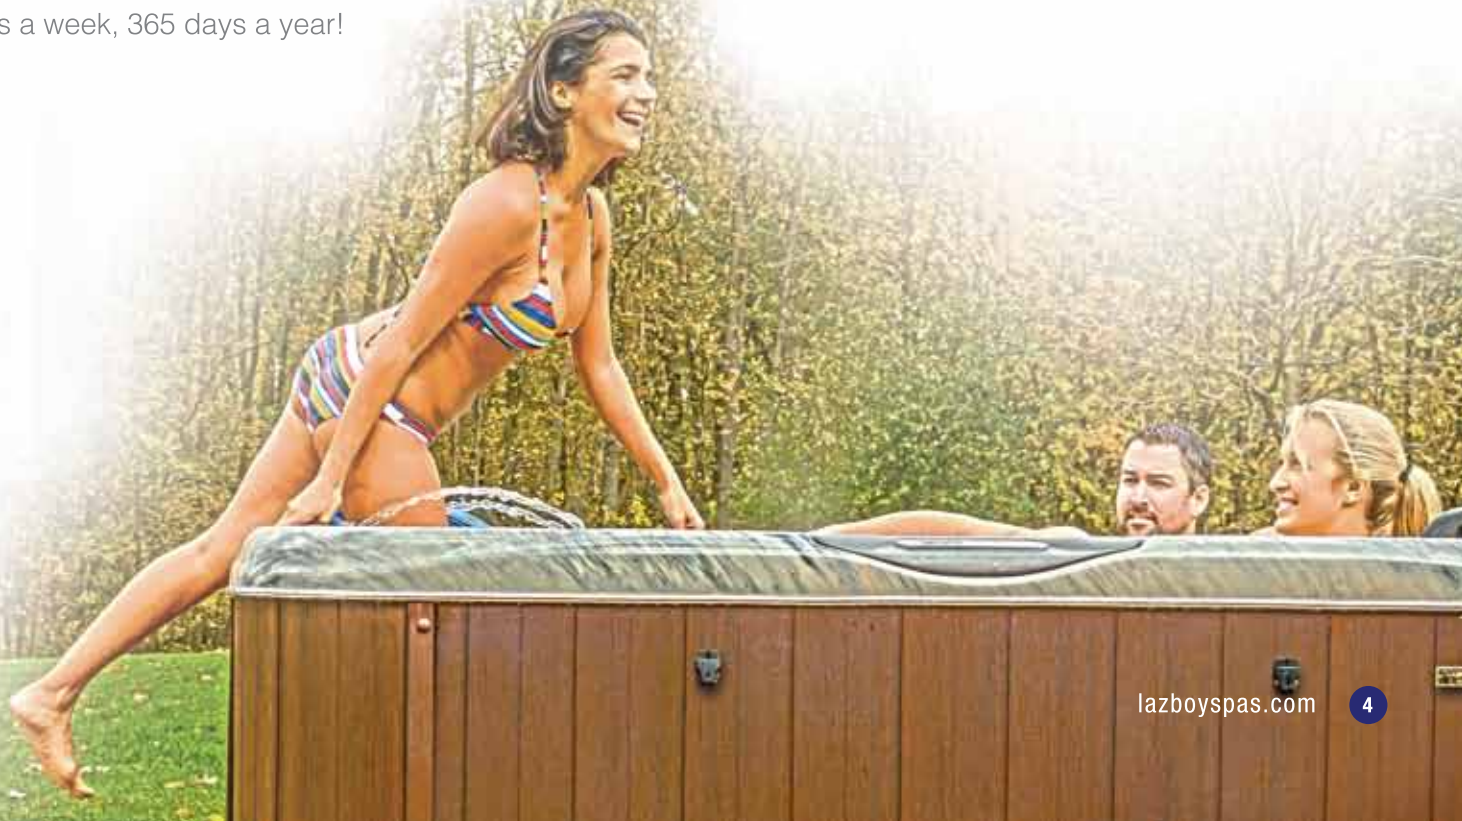

How many leisure activities targeted at relaxation can be readily enjoyed at any time, day or night, without ever leaving home? The answer is practically none! A recent survey of swimming pool owners revealed that many only enjoy their pools a few dozen times a year and jetted bathtubs are also used very infrequently! That's because pools and bath tubs located in colder parts of the country can't be enjoyed in the spring, autumn or winter and they take too much time and preparation before they can be used. In contrast, a La-Z-Boy® Spa is easy to use and is designed to consistently maintain the water temperature set by the user. As a result, it's always ready and waiting to be used for fun and relaxation - 24 hours a day, 7 days a week, 365 days a year!

Help Manage Diabetes

Researchers have reported that hot water and hydrotherapy including the regular use of a hot tub can help control diabetes. It has also been known to lower blood pressure and significantly reduce blood sugar. A Colorado based study recently revealed that diabetes patients who soaked in a hot tub for 30 minutes a day, 6 days a week found their average blood sugar level dropped by 13%!

Year Round Fun

A recent survey on usage revealed that owners have fun in their hot tub an average of 150 times a year! Hot tubs are designed to maintain the temperature you set them at and as a result your hot tub is always ready and waiting for you. Setting the water temperature in a La-Z-Boy® Spa is so easy. While lowering the temperature on a La-Z-Boy Spa helps beat summer heat, there are few moments in life that come close to the sheer pleasure of being surrounded by warm bubbling water on a crisp, cold night. So, don't worry about the temperature dropping, the sun going down or the seasons changing. Slipping into a La-Z-Boy Spa is always a year round fun and wonderful experience.

Take a seat.

It's been over 80 years since La-Z-Boy® founders Edwin Shoemaker and Edward Knabusch introduced the world to some of the most comfortable seating known to man. Just like the first La-Z-Boy chairs, La-Z-Boy Spas are engineered to be exceptionally high quality and the most comfortable underwater seating available anywhere today.

The Science of Sitting Underwater.

La-Z-Boy Spa seating and lounge designs provide exceptional comfort, relaxation and hydrotherapy benefits and are the perfect way to share time with family and friends. By optimizing seating ergonomics, our advanced designs deliver comfort and enhance the delivery of our Comfort Zone Hydrotherapy Massage System. Our unique Reclina-Seat balances the weight and position of the occupant to create additional comfort. Our engineering team has also discovered that ideal occupant buoyancy is achieved when reducing the right amount of weight on other parts of their body. Our seats fully support the lumbar/lower back region and the La-Z-Boy Comfort Rest Pillows support the head and provide maximum comfort for stretching back into your seat.

A massage experience like no other.

Our Premier collection hot tubs feature Comfort Zone Massage Technology that provides an advanced level of hydrotherapy massage in either a Comfort Corner or Reclina-Seat in each of the models. Bathers are able to conveniently turn the massage feature on or off by pressing the remote keypad that is located adjacent to the seat.

This will activate a soothing scrolling massage up and down the major muscle groups on the back. You can also easily adjust the massage intensity from as little as you want to as much as you like to customize the massage pressure and ensure the most comfortable massage experience possible.

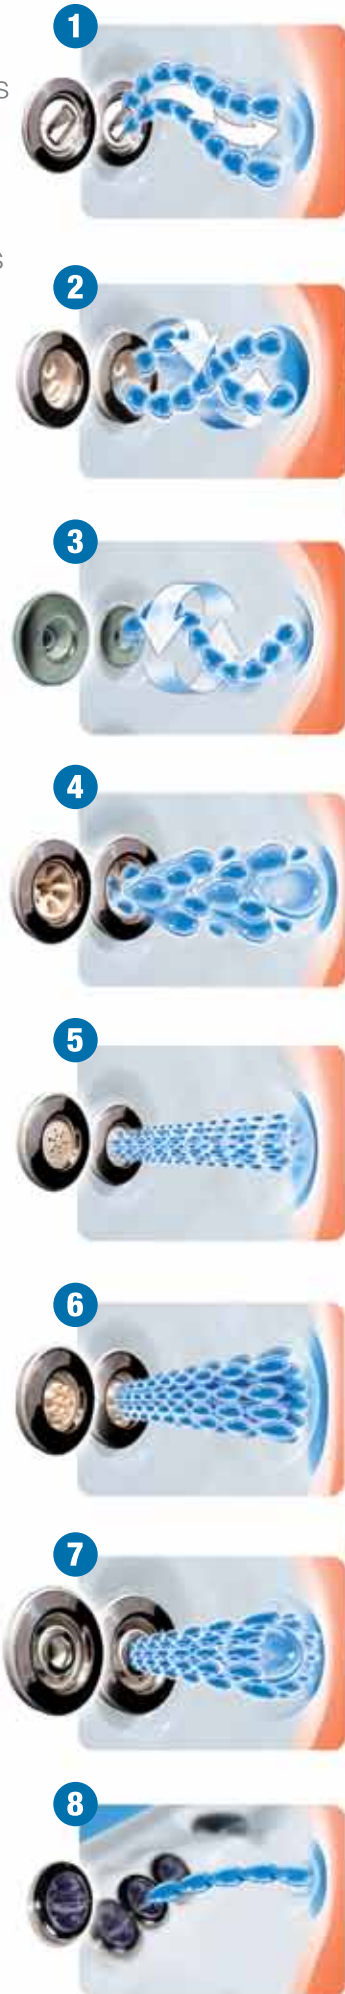

Comfort Zone Massage Technology

- Conveniently turn the massage on or off with the touch of a button at the seat.
- Provides soothing scrolling massage up and down the major muscle groups on the back.
- Easily adjust the massage intensity from as little as you want to as much as you like.

Comfort Massage Jets Precision Engineered, Perfectly Placed.

The All Active Comfort Massage Jets are custom-designed for La-Z-Boy® Spas and are designed for added comfort, reliability and performance. The precision engineering of the jets results in low resistance at all water pressures providing a unique comfort focused hydrotherapy experience.

It makes cents.

Energy efficiency is top of mind for all consumers and La-Z-Boy® Spas has taken every opportunity to make our hot tubs as efficient as possible. Manufactured to surpass CEC energy efficiency specifications, La-Z-Boy Spas are amongst the most energy efficient hot tubs made today. The La-Z-Boy Therma-Zone Insulation System delivers the ultimate in energy efficiency while providing mounting space for multiple components and easy access if the hot tub requires service.

The California Energy Commission (CEC) recognizes La-Z-Boy Spas as an Energy Efficient Appliance.

We are never at a loss...

La-Z-Boy Spas include a unique and highly efficient immersion electric heating system that maintains the hot tub's hot water temperature for just a few pennies per day. As an added benefit, the Therma-Zone Insulation System encapsulates the perimeter of the hot tub creating the ability to utilize the excess heat created by the pump(s) in the hot tub cavity. This dramatically lowers the hot tub's energy consumption and allows you to enjoy the benefits of hot water and hydrotherapy while saving both money and the environment.

Raising the Standard.

Just as the founders of La-Z-Boy® did at the beginning in 1927, we have taken tremendous care, attention and craftsmanship to create, design and manufacture each and every La-Z-Boy Spa.

Special consideration has been given to every aspect of the hot tubs from Maintenance-Free Cabinetry, Integrated Support Structures, our Comfort Fit Shell and state-of-the-art electronics. We start from the ground up...

premier features

The advanced features found on La-Z-Boy® Premier Spas are unrivaled around the world.

A Professional Masseur Right in Your Backyard with Premier Comfort Zone Massage Technology.

La-Z-Boy Premier Spas feature Comfort Zone Massage technology that provides a massage experience like no other. Bathers are able to conveniently turn the massage feature on or off by pressing the remote keypad that is located adjacent to the seat.

This will activate a soothing scrolling massage up and down the major muscle groups on the back. You can also easily adjust the massage intensity from as little as you want to as much as you like to customize the massage pressure and ensure the most comfortable massage experience possible.

La-Z-Boy Water Management System.

The La-Z-Boy Water Management System makes your La-Z-Boy Spa very easy to use and maintain. This high performance system utilizes efficient water management methodologies that ensure you and your family enjoy safe, clean and clear water. The La-Z-Boy Water Management System removes unwanted contaminants by an automatic micro-filtering process that is followed by a compressed charge of ozone gas, which oxidizes the dead bacteria and organics and discharges them into the atmosphere. Our Comfort Clean Filtration System automatically operates and scrubs the water to a sparkling shine.

AquaClear Salt Water System – *Optional.*

Easy to use and built to last, the AquaClear Salt Water System is one of the most efficient water sanitation systems offered in the hot tub industry today. La-Z-Boy Spas using the AquaClear System need very little maintenance, and the system can be easily installed as an option on all Premier collection models. The system uses sodium bromide (a form of salt) to generate and introduce bromine into the hot tub water, which rapidly destroys any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by bathers. The AquaClear Salt Water System makes the water feel great and significantly reduces the amount of time required to maintain your La-Z-Boy Spa.

Comfort Fit Shell with Reclina-Seat.

Comfort is our specialty and nobody knows this better than the seating designers and engineers at La-Z-Boy® Spas. Our hot tubs feature a unique seating design that has been crafted to mold to your body enabling you to truly submerge yourself in the La-Z-Boy Spa experience without *"floating to the top."* Each Reclina-Seat comes with its own personal Comfort Zone Massage control panel and Comfort Massage jets allowing uninterrupted individual enjoyment and pleasure. In addition, special care has been taken to ensure that La-Z-Boy Spa shell designs not only offer exceptional comfort but also maximize interior space. Only top quality materials are used to fabricate La-Z-Boy Spas premium acrylic and a third layer of space age fiberglass and resins to ensure maximum comfort, reliability and durability. An overwhelming number of doctors agree that relaxation at home is important to effectively reduce stress and the vast majority of doctors (96 percent) agree that sitting at home in a reclining position promotes relaxation.

the Harmony Hot Tub features a Reclina-Seat

On average, doctors recommend about one hour of relaxation each day, in conjunction with other healthy behaviors, to relieve stress. The regular use of a La-Z-Boy Spa Reclina-Seat is a wonderful way to reduce stress, recuperate and relax at the end of a busy day.

Accupressure Neck Massage

Wait, there's

La-Z-Boy® Premier Spas Are Packed With Unrivalled Features.

AquaCoustics Surround – *Optional.*

Stunning electronics and high quality speakers create an exceptional audio experience that is as pleasing to your ears as the hot tub is to your body. This exceptional audio system creates an unparalleled entertainment experience which can be enjoyed whether you are using the hot tub or just simply relaxing outdoors.

iCommand System – *Optional.*

Our innovative La-Z-Boy Spas iCommand allows the user to control the functions of the hot tub using a smart phone. Simply download and install the In-touch app and ensure that the hot tub is within range of a wireless router and you will be instantly connected! With the optional La-Z-Boy Spa's iCommand you can always be in touch with your La-Z-Boy Spa. This is especially useful for frequent travellers and second home or cottage / cabin installations!

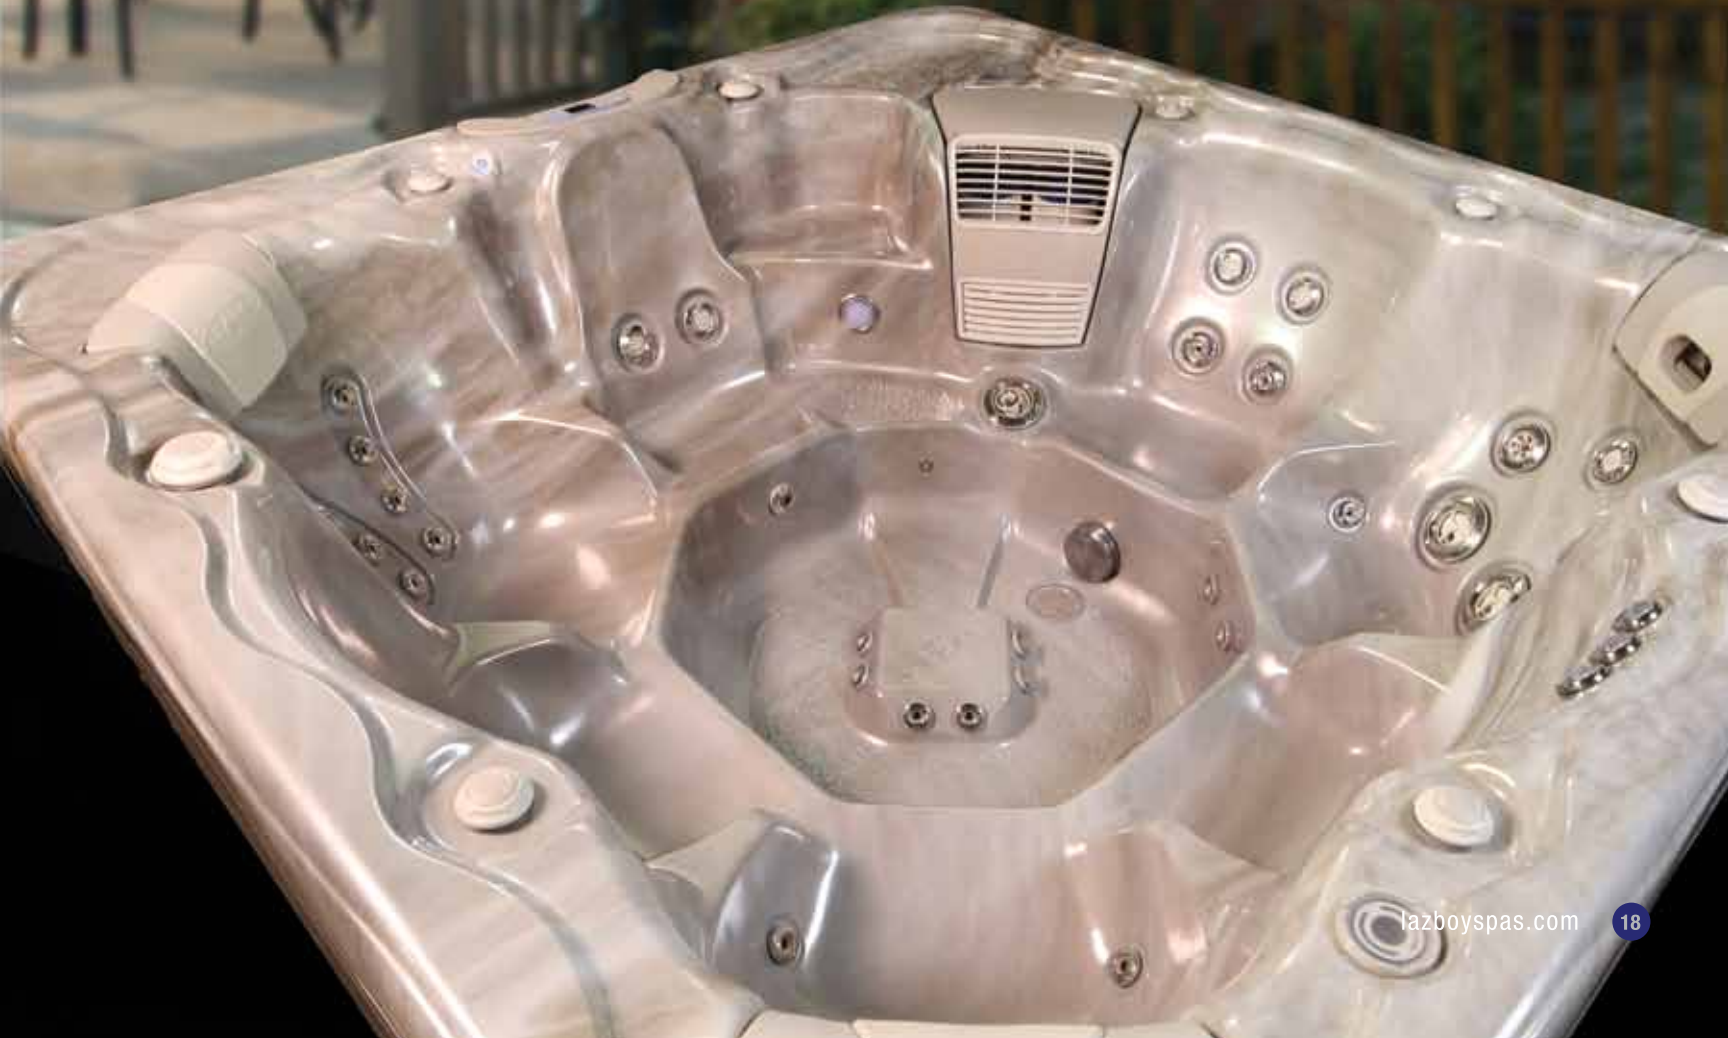

more....

Integrated Support Structure.

La-Z-Boy Premier Spas are constructed with a heavy-duty support structure that is bolted to the Comfort Fit Shell by a fully integrated blocking system.

The Integrated Support Structure's low profile design allows for a thicker insulation barrier, which is vulcanized onto the perimeter walls, creating one of the strongest and most energy efficient hot tubs available today.

tranquility

Lay back and relax in the La-Z-Boy® exclusive Reclina-Seat and feel your stress melt away. This hot tub includes our unique and exclusive Comfort Zone Massage Technology so just sit back and let the soothing, bubbling customized massage pattern work its magic on your body. So go ahead, seek tranquility and you will find it. You will wonder how you ever lived without it.

premier cost efficiency

This system delivers the ultimate in energy efficiency.
The 6 Part Therma Zone Insulation System.

Energy efficiency is top of mind for many consumers and La-Z-Boy Spas has taken every precaution to be as efficient as possible. Manufactured to exceed CEC energy efficiency specifications, La-Z-Boy Spas are amongst the most energy efficient hot tubs made today.

Our Therma Zone Insulation System includes 5 insulating barriers including the color coordinated cover. The plumbing, shell and floor are sealed in a Thermal Shield insulated blanket. As an added layer, the same Thermal Shield insulated blanket is installed on the backside of the cabinet around the entire perimeter of the hot tub. A vent is mounted in the cabinet to retain excess heat created by the pumps while allowing it to be exhausted in high outdoor heat installations.

L A Z B O Y®
S P A S | S I G N A T U R E

Advanced Technology:

Optional Features:

signature features

More advanced features included with La-Z-Boy® Signature Spas and not usually found on any other comparable hot tub.

What we know best - the Comfort Fit Shell.

Comfort is our specialty and nobody knows this better than the seating designers and engineers at La-Z-Boy Spas. Special care has been taken to ensure that every aspect of our shell designs maximize interior space and user comfort. Only top quality cross-linked acrylic and vinyl ester resins are used in our special manufacturing process. For extra strength and long-term durability, a third layer of space age fiberglass and polyester resins have been applied.

Built-in Safety Grab Handles

Built right into the hot tub mold on La-Z-Boy Signature Spas are a number of safety grab handles. These integrated maintenance-free grab handles help you to safely get in and out of the hot tub and comfortably move around its interior.

Comfort Zone Massage Technology.

La-Z-Boy's exclusive Comfort Zone Massage Technology allows the user to adjust the massage intensity from as little as they like to as much as they want. The Comfort Zone Massage Technology also allows the user to easily select an all over body massage including AcuPressure Neck Massage or just Relaxology Foot Massage. Our Comfort Zone Massage Technology combines the In-Touch 2000 Electronic Controls with special Comfort Massage Jets, hydraulically balanced Comfort Massage Pumps and manual Comfort Zone Massage Controls. It's like having a personal Hydrotherapist right in your own backyard!

Go Ahead, Put Your Feet Up

Relaxology is the belief that each specific part of the hands and feet represent, and are connected to, a distinct area of the internal body. Relaxology is known to alleviate discomfort and promote healing by the application of pressure to areas of the hands and feet, which break up patterns of stress in other parts of the body. La-Z-Boy® Spas are designed to specifically offer this treatment and help to improve your wellness.

The left foot reflects the left side of the body and halfway down the foot at the base of the long bones of the foot represents the waistline of the body. Parts of the body above the waistline are mirrored above this line and those below are represented below it. The internal organs lying above the body's waistline are reflected by reflex areas above the line while those below the waistline are mirrored below this line.

The right foot reflects the right side. The spine reflex area runs down the insides of the feet and hands with reflex areas for the arm and shoulder reflected toward the outside of the foot or hand. The toes mirror the head and neck as well as the parts of the body they encase. The ball of the foot mirrors the chest and upper back in addition the heart and lungs.

The colored areas on each foot represent different parts of your body ranging from your major organs and sections of your torso.

Take comfort there

signature features that add to your hot

La-Z-Boy® Water Management System.

The La-Z-Boy Water Management System makes your La-Z-Boy Spa very easy to use and maintain. This high performance system utilizes efficient water management methodologies that ensure you and your family enjoy safe, clean and clear water. The La-Z-Boy Water Management System removes unwanted contaminants by an automatic micro-filtering process that is followed by a compressed charge of ozone gas, which oxidizes the dead bacteria and organics and discharges them into the atmosphere. Our Comfort Clean Filtration System and Circulation Pump automatically operates and scrubs the water to a sparkling shine.

24 / 7 Circulation Pump

A dedicated circulation pump in combination with the dual micro filtration system scrubs the hot tub water to a brilliant shine to ensure that the water is fresh and ready when you are. The circulation pump is an extra energy efficient pump and motor that is designed to deliver strong performance at low operating speeds and at minimal cost. Its high quality and maintenance free design ensures that you can take comfort in knowing that you will receive years of trouble free enjoyment.

Ozone Purifier With Treatment Chamber

All La-Z-Boy Spas are equipped with an Ozone Purifier that is highly effective in removing unwanted contaminants from the water by means of an electronic oxidation process. The equipment area houses a corona discharge Ozone Purifier and the system includes a dedicated ozone treatment chamber where the ozone is pressurized for introduction to the water. The Treatment Chamber ensures that the ozone is safe for bathers and performs as effectively as possible.

Dual Micro Filtration System

This intake filtration system is powered and digitally controlled by the 24 / 7 Circulation Pump. The filtration system scrubs and micro-filters the hot tub water up to 24 hours a day 7 days a week keeping the hot tub water clean, clear, safe and comfortable. The filtration system has two large capacity cartridge filters that are easily accessible for service.

Built In Floor Drain

All La-Z-Boy Spas offer the added convenience of a built-in floor drain. On a periodic basis, spa water must be drained and refilled. The positioning and size of the drain in your La-Z-Boy Spa will discharge the hot tub water up to 25 percent faster than competitive brands. The built-in floor drain is very effective in draining a high percentage of the hot tub water.

's more... tub experience

AquaClear Water Management System – Optional

Easy to use and built to last, the AquaClear Salt Water System is one of the most efficient water sanitation systems offered in the hot tub industry today. La-Z-Boy Spas AquaClear System need very little maintenance, and the system can be easily installed as an option on all Signature collection models. The system uses sodium bromide (a form of salt) to generate and introduce bromine into the hot tub water, which rapidly destroys any microbiological contaminants such as water borne bacteria, algae, and organic matter given off by bathers. The AquaClear Salt Water System makes the water feel great significantly reduces the amount of time required to maintain your La-Z-Boy Spa.

iCommand System – Optional

Our innovative La-Z-Boy Spas iCommand allows the user to control the functions of the hot tub using an iPad, iPhone or iPod touch. Simply download and install the In-touch app and ensure that the hot tub is within range of a wireless router and you will be instantly connected! With the optional La-Z-Boy Spas iCommand you can always be in touch with your La-Z-Boy Spa. This is especially useful for frequent travellers and second home or cottage / cabin installations!

This feature will be music to your ears when your spa is your backyard entertainment center.

AquaCoustics Sound System – Optional

Includes two speakers that are installed right into the acrylic shell of the hot tub. Audio functions are controlled directly from the hot tub's topside electronic controls. A convenient iPod holder with MP3 input is mounted in the cabinet and a marine grade amplifier turns your iPod into an exceptional spa experience that is as pleasing to your ears as the hot tub is to your body. The La-Z-Boy® Signature AquaCoustics MP3

Surround Sound system creates an added level of fun and entertainment in your backyard and can be enjoyed whether using the hot tub or just relaxing outdoors.

Advanced Technology:

signature cost efficiency

This system delivers the promise of energy efficiency at its best.
The 6 Part Therma Zone Insulation System.

Energy efficiency is top of mind for many consumers and La-Z-Boy Spas has taken every precaution to be as efficient as possible. Manufactured to exceed CEC energy efficiency specifications, La-Z-Boy Spas are amongst the most energy efficient hot tubs made today. Our Therma Zone Insulation System includes 6 insulating barriers including the color coordinated cover.

The plumbing, shell and floor are sealed in a Thermal Shield insulated blanket. As an added layer, the same Thermal Shield insulated blanket is installed on the backside of the cabinet around the entire perimeter of the hot tub. A vent is mounted in the cabinet to retain excess heat created by the pumps while allowing it to be exhausted in high outdoor heat installations.

Advanced Technology:

classic comfort

Ample comfortable seating and a generous foot well are at the forefront in our increasingly popular Classic Collection Models. Our innovative “Lazy Lounge” and “Comfort Corner” is the perfect way to wind down and relieve stress after a busy day. Simply enjoy the soothing hot water and hydrotherapy for just a few cents per day. There is just no easier way to get into high quality, comfortable, energy efficient and reliable hot water.

Relax in the Comfort Fit Shell.

Your total comfort is maintained by the seating design in our Classic Collection the curvature of the seating makes them extremely comfortable. The same special care has been taken to ensure that every aspect of our shell design maximizes interior space and comfort.

Integrated Support Structure.

La-Z-Boy Classic Spas also feature a heavy-duty support structure that is bolted to the Comfort Fit Shell by a fully integrated blocking system. The Integrated Support Structure's low profile design allows for a thicker insulation barrier, which is vulcanized onto the perimeter walls, creating one of the strongest and truly energy efficient hot tub.

La-Z-Boy® Spa's Water Management System.

The La-Z-Boy Spa's Water Management System makes your Classic Collection Hot Tub very easy to use and maintain. This system utilizes efficient water management methodologies that ensure you and your family enjoys safe, clean and clear water.

Single Micro Filtration System

This intake filtration system has one large capacity cartridge filter that maintains the hot tubs cleanliness. The filtration system scrubs and micro-filters the hot tub water up to 24 hours a day 7 days a week keeping the water clean, clear and safe.

We build hot tubs to last.

Our hot tubs will stand the test of time - not to mention your kids. Our strong, state of the art and fully integrated support structure can handle whatever your family might dish out.

La-Z-Boy® Spas are crafted to the highest industry standards with our frames, plumbing, mechanisms, cushions and shells constructed from the finest quality materials. Our hot tubs are comprehensively water tested in our manufacturing facility before being certified to carry the La-Z-Boy name and, just like La-Z-Boy furniture, they are quality tested before they leave our door. Superior quality control is our way of life. So get in, get comfortable and enjoy life.

We support you all the way with...

Unlike other manufacturers that may offer a limited warranty, La-Z-Boy® Spas offers its customers a 100% No Nonsense, No Fine Print Guarantee to ensure peace of mind and care-free enjoyment.
